

Product suitable for use in Organic Agriculture conforming to the annexes of the (EC) regulation n° 2018/848 and 2021/1165 and of NOP Regulation. Inspected by ECOCERT SA F-32600

CAL-FLO (SC)

GROUP 2 FERTILIZER | Reg. No. B 5448 Act 36 of 1947

CAL-FLO is a micronized liquid suspension concentrate of calcium carbonate that can be applied through the drip-, micro-, pivot- irrigation systems and/or air-, boomspray or any other agricultural crop spraying equipment.

COMPOSITION WHEN PACKED

Ca: 203 g/ kg (288 g/L) | SG @ 20 °C : 1.42 ±0.02 | Particle size: ≤ 5 µ (microns)

DIRECTION FOR USE

- Apply 15 to 30 liters per hectare, depending on the percentage acid saturation, the pH level of the soil, the soil type, the plant growth stage, crop stress levels and the amount of freely available calcium and other nutrients.
- Soil treatment mixing ratio: irrigation systems, boomspray, etc.: 1L CAL-FLO to 20L of water. Knapsack sprayer: 1L CAL-FLO to 15L of water.
- In case of any uncertainty regarding the use of the product, consult with registration holder or your consultant.
- CAL-FLO is manufactured from natural rock, thus composition may vary.
All terms and conditions apply
